

## Join us for an encaustic painting demonstration

**Saturday, September 10, 2022  
at our monthly member meeting**

*Encaustic is a paint made of beeswax, resin and pigment. Melted and applied to an absorbent surface, it is then fused (re-melted) to create a variety of effects. An ancient painting tradition, artists are rediscovering the amazingly versatile medium which lends itself to a wide range of creative expression.*

Safe studio set up & practices

Use of tools & materials (paint, medium, supports)

Examples of ancient & contemporary encaustic work

Technique demonstrations include paint application and fusing,  
color mixing, creating texture, scraping/incising, collage & embedding,  
image transfers, masking & stencils ....
